Ceramica Globo bathroom furniture, was created to support the wide range of ceramic washbasins. With a minimal style, multi-material textures and functional features, it allows you to furnish spaces according to different dimensional and containment needs and to compose a tailor-made setting.

Ceraslide®

A special formulation of glaze, obtained by an accurate temperature control during the various cooking phases and in a cycle of up to 26h, to ensure uniformity, resistance and inalterability over time. To the manufacturing is added the antibacterial treatment based on silver, ions which gives maximum hygiene.

- 1 Resistance
- 2 Bright colour
- 3 Deep hygiene
- 4 Easy to clean

No Rim

The study of the water exit point to eliminate both the edge and the hidden parts of the toilet bowl. Obtaining an optimal water flow, at the service of maximum hygiene, and also accurate aesthetics.

- 1 Easy to clean
- 2 Design
- 3 Silent
- 4 Piloted water flow

Cleanstorm® New

The Forty3 collection evolves with a new version that blends innovation and contemporary design. Introducing the new 55x36 cm model, designed to optimise space without compromising comfort. The strength of this evolution is the CLEANSTORM® NEW flushing system, discreetly integrated to achieve a sleek and refined aesthetic. With its concealed positioning, the surface appears homogeneous and free from visible openings, enhancing the purity of its design while ensuring maximum hygiene, efficiency and quiet operation.

- 1 CLEANSTORM® NEW
- 2 Easy to clean
- 3 Silent
- 4 Piloted water flow

Bataform®

The antibacterial BATAFORM® treatment was developed to ensure deeper hygiene, basing its effectiveness on the reaction of silver ions, which inhibit the proliferation of bacteria. Tests carried out by certified laboratories, according to the ISO 22196:2011, have confirmed a drastic decrease in the presence of bacteria, without however altering the glossy glaze.

- 1 Resistance
- 2 Bright colour
- 3 Deep hygiene
- 4 Easy to clean

Globothin®

After years of continuous and arduous research, the laboratory of Ceramica Globo has invented a new patented mixture named GLOBOTHIN® which enables to reduce the edge thickness, on the one hand, while providing brighter gloss and greater resistance, on the other hand. Tests conducted by certified laboratories have given, according to the law UNI 4543, excellent results as far as water absorption and mechanical resistance are concerned. This ensures a brighter gloss of the glaze and determines an improvement of about 38% more than the minimum threshold provided for by law.

- 1 Design

Easy detach

The quick-release hinges allows to remove the toilet seat with one simple gesture.

- 1 Easy to clean

Multi® Multi® 2.0

Hydraulic technologies for back-to-wall installations of WCs and bidets by connecting them to existing drains and fittings. For effective retrofitting and clean design.

- 2 Ideal for renovations

Cleanstorm®

A drainage system with a silent and piloted water flow, which frees the tub from the rim, obtaining a linear design, that ensures deep and accurate cleaning.

Award
DESIGN PLUS
powered by ISH

Without tap hole

To order a washbasin with 1 tap hole, please add the number '1' before the color variant.

To order a washbasin with 2 additional tap holes, please add the number '3' before the color variant.

Washbasins available with 1 tap hole are also available without a tap hole, by composing the code as shown in the following example:

Ex:
GE061BI → Basin without tap hole
GE0611BI → Basin with one tap hole

Ex:
SCQ62BI → Basin with one tap hole (standard)
SCQ623BI → Basin with 3 taps hole

Ex:
B6R80SBI → Basin with one tap hole
B6R80S0BI → Basin with one tap hole

Additional charge for tap hole: € 30,00
(ex. basin GE061BI € 485,00 + € 30,00 = € 515,00)

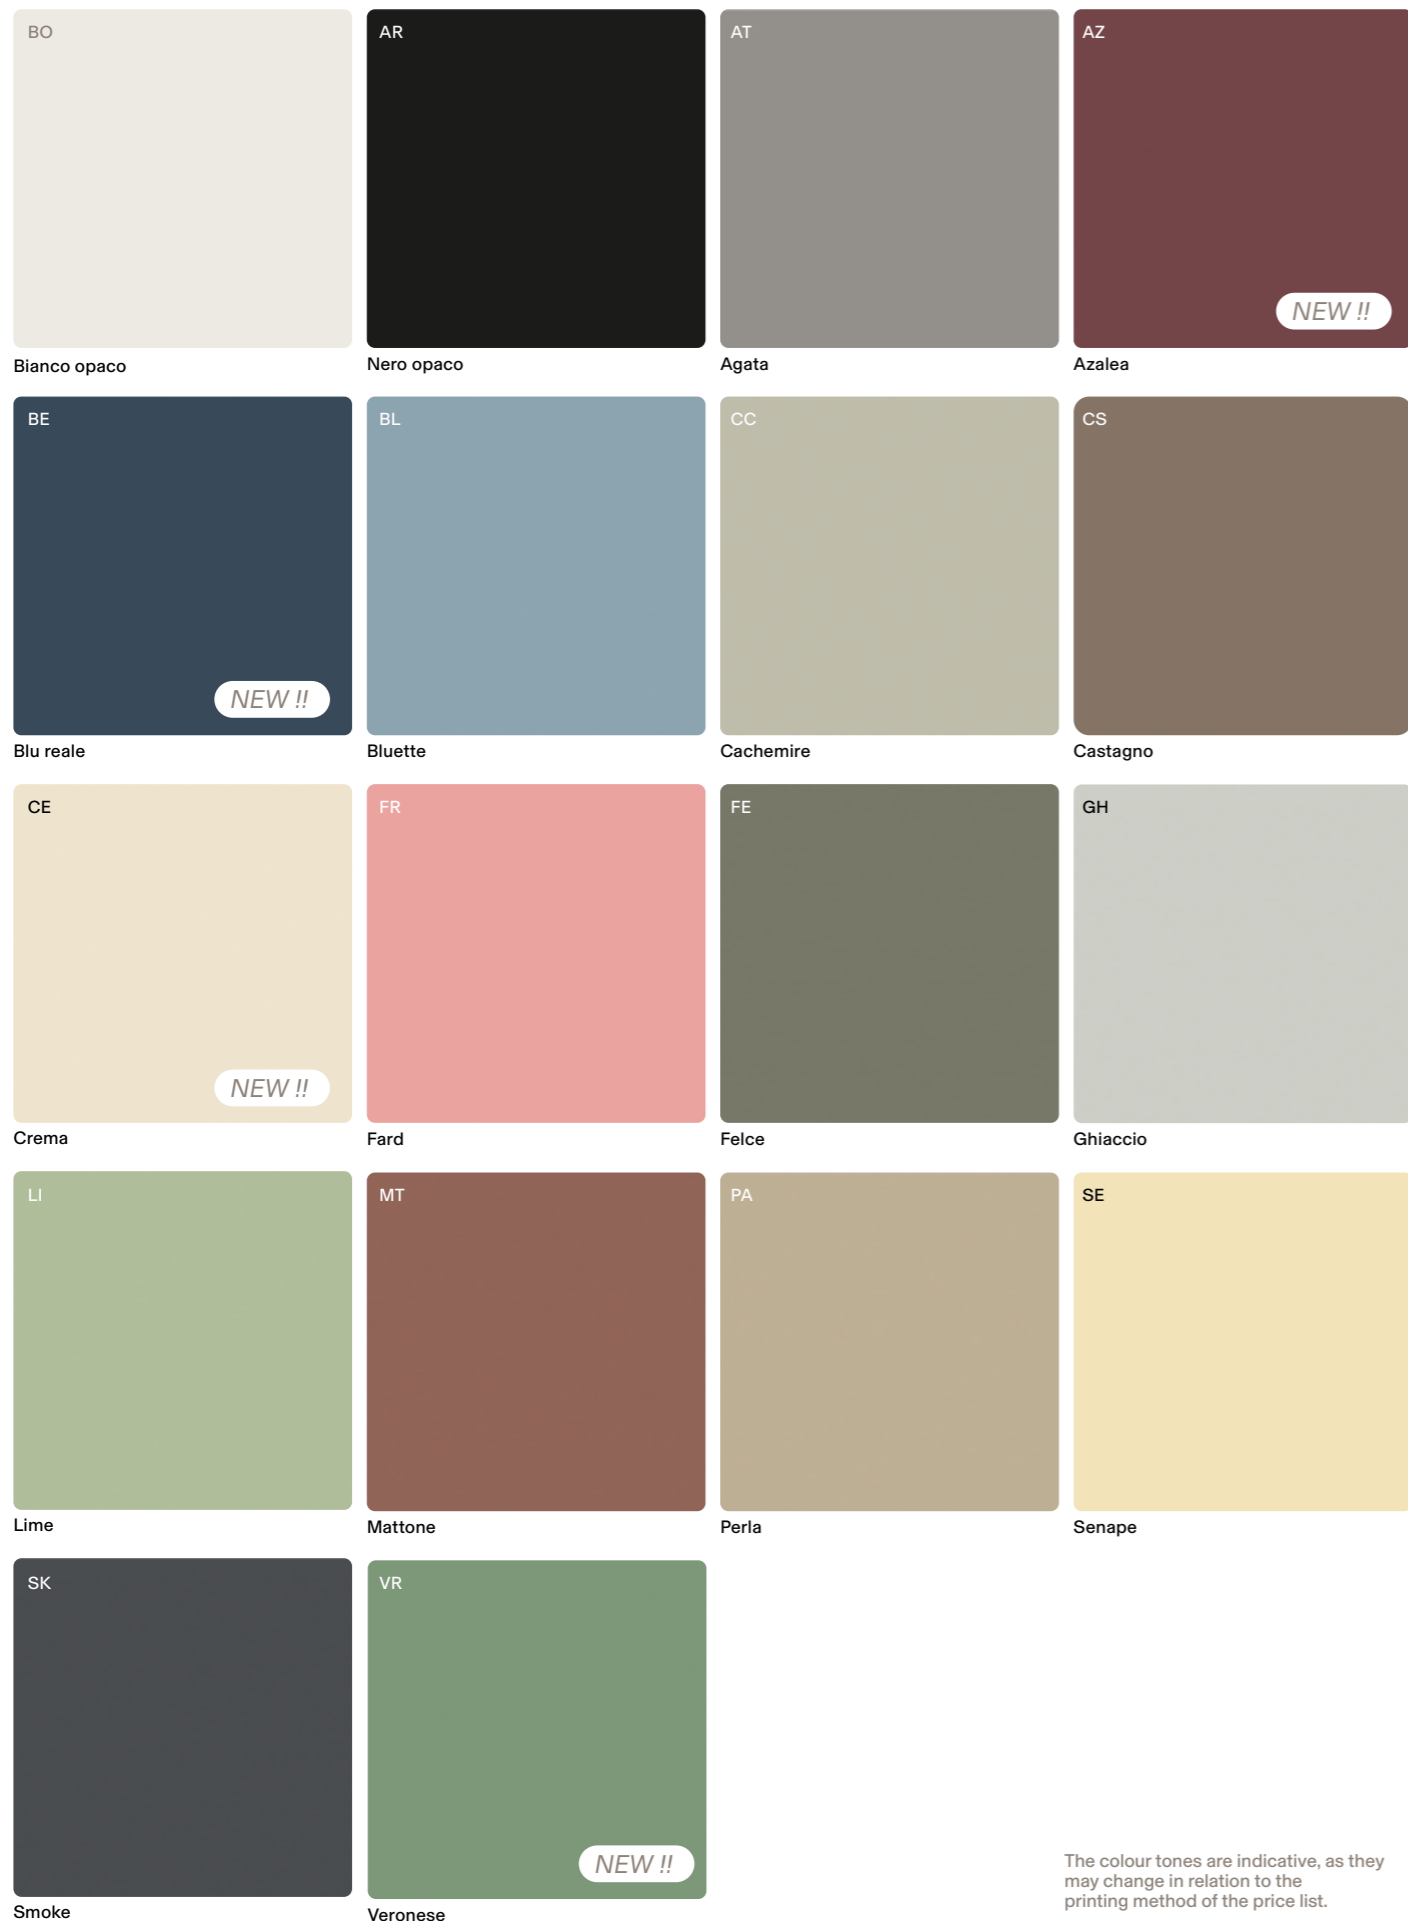

Additional charge for two tap holes: € 60,00
(es. basin SCQ623BI = € 442,00 + € 60,00 = € 502,00)

Wc's washing and water flow reductor

Some of the Globo pans (that are mentioned in the price list) in case of installation with other flushing cisterns, instead of the modes mentioned above, for the normal use of the wc, it is suggested to buy the flow reductor Cod VA132

IT IS NOT RECOMMENDED TO USE FLOWMETERS AND HIGH OR UNDER WINDOWS CISTERNS.

FO031XX 30×34,5

The bathroom as a space to live and furnish. Like the choice of materials, colour plays a key role in giving personality and identity to the rooms. Following decorating trends and styles, Ceramica Globo has developed 18 ceramic colours as an alternative to the classic white, capable of astonishing, intriguing and inspiring architects and interior designers. The Bagno di Colore line as a stimulus to creativity, through soft and silky tactility and full and opaque shades, which recall the earth and nature and the colours of the Mediterranean scrub. For a customisation of the bathroom in every details

Riflessi di Luce (10) R

Ten glossy colors boasting an unprecedented brilliance. The Riflessi di Luce collection is now enriched with three new striking shades: Cherry, Lavanda, and Sand. These sophisticated hues are the result of an extensive, in-house research process, culminating in bold and refined colors that guarantee exceptional reliability and the highest quality standards. The ten colors feature a glassy surface so luminous and deep that it brings the ceramic closer to the appearance of crystal. The glaze offers a full, compact effect that beautifully enhances and reflects light, highlighting the distinctive lines and geometries of the washbasins. This effect is achieved through a specialized production process requiring three high-temperature firings: two to permanently “set” the color, and the third to ensure maximum, unparalleled brilliance.

The colour tones are indicative, as they may change in relation to the printing method of the price list.

Le Pietre (14)

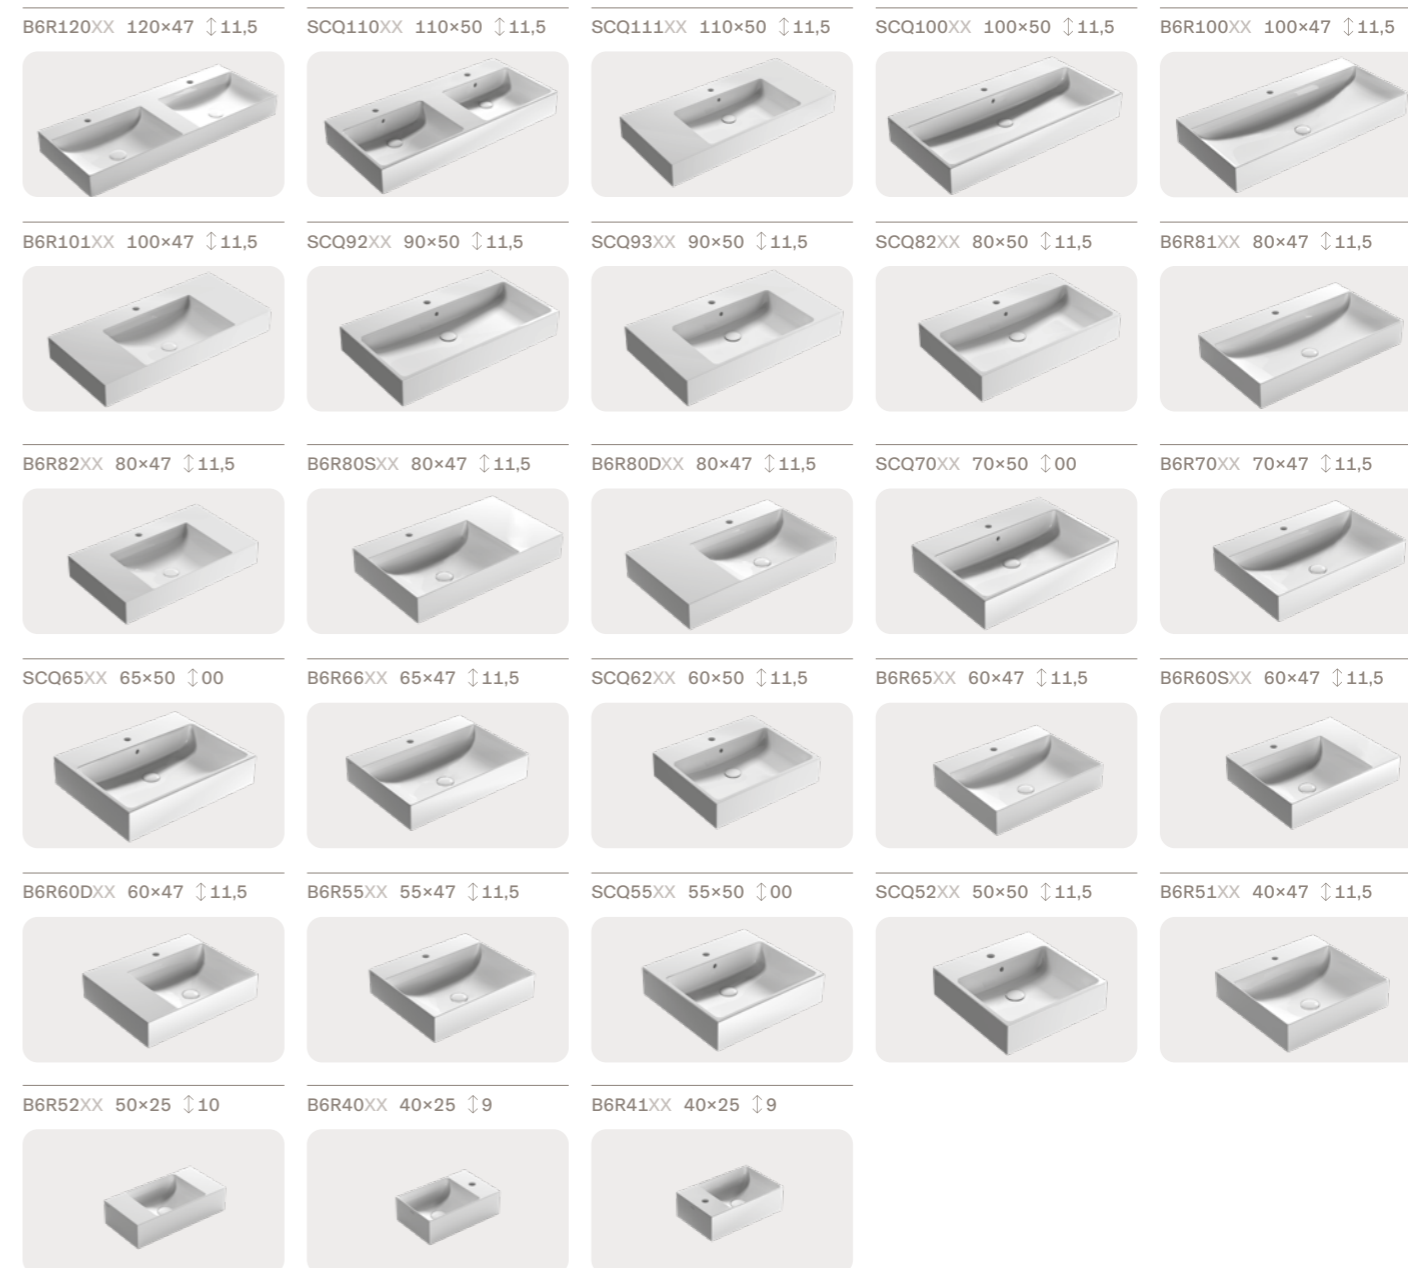

Grits, arabesque rocks, rare and precious marbles and stones that have always been part of our local architectural history, such as Travertine and gray Peperino. Ceramica Globo recreates these refined effects in some washbasins of its collections to embellish the atmosphere of the bathroom and give the compositional possibilities of the setting an even more articulated and diversified structure.

The colour tones are indicative, as they may change in relation to the printing method of the price list.

Cleaning and maintenance

Shiny white ceramic

To maintain the brilliance and purity of shiny white ceramic surfaces over time, it is recommended to use warm water along with specific detergents for daily ceramic cleaning.

☑ It is recommended to dry thoroughly with a microfiber cloth to prevent formation of halos or patches of limestone, in particular in areas in frequent contact with water.

☒ It is not recommended the use of abrasive detergents, products alcohol-based or with strongly acidic components or basic, as well as nitrous solvents or acetone, which could damage the finish and alter it the original brilliance.

Ceramic (colours and finishes)

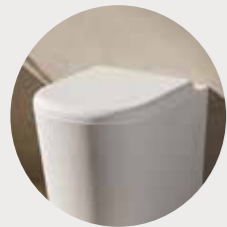

To preserve the brilliance and color uniformity of colored surfaces over time, a daily cleaning with a soft, slightly damp cloth is sufficient. This simple care allows you to maintain the original appearance of the ceramic and finishes unchanged, avoiding the accumulation of residues or opacities.

☑ It is preferable to use mild, neutral detergents or specific for ceramic surfaces, applied with light movements and rinsed with clean water.

☒ Avoid using abrasive powders, metal sponges or steam cleaners, which could compromise the surface or alter the color tone.

Seat-covers

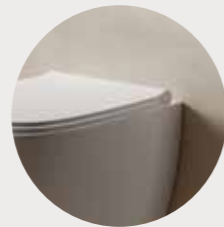

To ensure durability and shine over time, it is recommended to clean the seats with sponges and soft cloths using only neutral soap and water. This simple daily maintenance preserves the original appearance without affecting metal surfaces or components

☑ It is recommended to use only detergents neutral and delicate. In case of cleaning products of the prolonged effect ceramic, prevent them from entering in contact with the pot cover and its metal parts.

☒ Avoid keeping the ring and lid down during the use of anti-limescale products: vapors can alter the brilliance and color, especially in colorful seats, more sensitive to color variations

Easy detach

The quick release hinge system allows you to easily remove the seat for a more thorough and complete cleaning. By pulling the seat upwards, it disengages from the studs without the need for tools. To reassemble it, simply reposition the two hinges on the studs and push them down until they are completely locked.

The hinges are made of European-made stainless steel (AISI 303/304). Incorrect cleaning or contact with vapours containing hydrochloric or sulphuric acid can compromise the surface gloss, causing redness or oxidation: this is a purely aesthetic effect, which does not compromise the structural solidity of the material.

Steel (powder-coated)

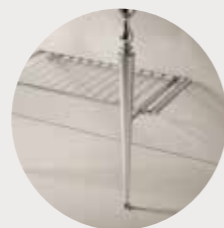

Powder coated steel surfaces are durable and long-lasting, but they require regular, gentle cleaning to maintain their shine over time. It is recommended to use pure water, possibly with a small amount of synthetic detergent at neutral pH, applied with a soft cloth.

☑ Only use soft, fiber-free cloths, sponges, suede, or soft-bristled brushes, performing gentle movements.

☒ Avoid rubbing vigorously or using products abrasives that could dull or damage the coat.

Steel (chrome)

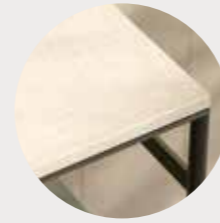

Chromed steel surfaces are characterized by their high gloss and must be cleaned regularly to preserve their appearance. The use of specific chrome cleaning products, readily available commercially, or a soft cloth slightly moistened with water and diluted alcohol is recommended.

☑ It is recommended to dry the surface well to avoid stains or streaks.

☒ Do not use abrasive sponges, cleaning powders, or acidic substances that can scratch or dull the finish.

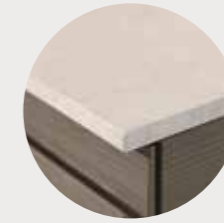

Dekton®

Dekton® surfaces stand out for their high strength, but to keep them clean and shiny at all times it is recommended to use delicate products.

☑ Apply neutral soap to the affected area and rub gently with a damp microfiber cloth, performing circular movements. Leave to act for a few minutes, then remove any residue with a clean cloth and dry with kitchen paper or a soft cloth.

MDF

MDF surfaces require gentle cleaning to preserve the finish and integrity of the material.

☑ For thorough cleaning, use a soft cloth moistened with a small amount of neutral, non-abrasive detergent, not containing ammonia and vinegar (e.g. mild degreaser). Rinse with a clean, damp cloth and dry with a soft, dry cloth.

☒ Avoid using aggressive products or excess water, which could penetrate the material and damage it.

Thermostructured melamine

Thermostructured melamine surfaces are durable and easy to keep clean with simple adjustments.

☑ Use normal household hygiene products. Apply the detergent on a damp soft cloth, clean, then rinse.

☒ Avoid abrasive products, bleach or strongly chlorinated substances, strong acids and bases, very abrasive sponges that can polish the surface.

TekorStone® (shower trays)

TekorStone® surfaces are durable and easy to keep clean, but require proper maintenance to preserve their shine over time. After each use, it is recommended to rinse the surface thoroughly.

☑ Use soap and water or common neutral detergents to remove most stains and dirt that may settle.

☒ avoid aggressive chemicals such as acetone, trichloroethylene, strong acids and bases, cosmetics and dyes, in prolonged contact with the material can release colorants onto the surface.

Livingtec® (bathtubs)

Livingtec® is a compact and durable material, which retains its original appearance over time with constant and thorough cleaning.

For daily maintenance, use a liquid limescale cleaner (e.g. Viakal®, Ajax®, Cif®) and a soft sponge. In case of halos due to calcareous water, they can be removed with a slightly abrasive sponge, wetted with water or detergent. For stubborn stains, light chips, or deep scratches, gentle sanding with 400-600 grit sandpaper is recommended, followed by thorough rinsing and drying with the soft part of the sponge

Solid Surface® (bathtubs)

Solid Surface® bathtubs are easily cleaned thanks to the strength of the material, but it is important to use appropriate products.

☑ Suitable products: cream or powder detergents such as Cif®, Vim® or the like with light abrasive micro-granules; denatured ethyl alcohol can be used, taking care to rinse well.

☒ Unsuitable products: solvents such as acetone or trielin, strong acids (muriatic acid) or strong bases (caustic soda), drain cleaners or industrial solvents. If in doubt, always test the product in a barely visible area before full application.

Tekor® / Tekorlight® (bathtubs)

Tekor® and Tekorlight® surfaces are durable and easily restorable.

☑ For daily cleaning, use a powdered detergent (e.g. Vim®, Calinda®, Ajax®) with a Scotch-Brite type abrasive sponge® or a chlorine or bleach based cleaner. To remove limescale stains, periodic use of limescale removers is recommended. To maintain the original opaque appearance, clean occasionally with Amuchina® or a diluted bleach solution (1 part in 20 of water). To revive the satin or opalescent finish, occasionally pass a Scotch-Brite® sponge in circular motions.

Simple Fiber (bathtubs)

Simple Fiber bathtubs should be cleaned with warm water and soap or neutral detergents, applied with a soft cloth."

☑ Suitable products: neutral liquid detergents can be used for normal surface cleaning. You are advised to apply the product with a soft cloth, rinsing carefully with water.

☒ Unsuitable products: never use abrasive products or substances with an alcohol, acetone or other solvent base. never use sponges with a metal or abrasive mesh.

Globothin®

After years of continuous and arduous research, the laboratory of Ceramica Globo has invented a new patented mixture named GLOBOTHIN® which enables to reduce the edge thickness, on the one hand, while providing brighter gloss and greater resistance, on the other hand. Tests conducted by certified laboratories have given, according to the law UNI 4543, excellent results as far as water absorption and mechanical resistance are concerned. This ensures a brighter gloss of the glaze and determines an improvement of about 38% more than the minimum threshold provided for by law.

Bataform®

The antibacterial BATAFORM® treatment was developed to ensure deeper hygiene, basing its effectiveness on the reaction of silver ions, which inhibit the proliferation of bacteria. Tests carried out by certified laboratories, according to the ISO 22196:2011, have confirmed a drastic decrease in the presence of bacteria, without however altering the glossy glaze.

- 1 Resistance
- 2 Bright colour

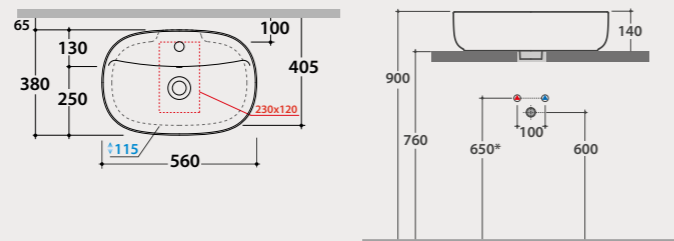

- 3 Deep hygiene
- 4 Easy to clean

Ceraslide®

The careful control of temperatures in the various cooking stages, in a cycle that can last up to 26 hours, ensures perfect homogeneity of the product during the sintering process, reducing porosity and guaranteeing greater resistance against stains, dirt and abrasion.

Bataform®

The antibacterial BATAFORM® treatment was developed to ensure deeper hygiene, basing its effectiveness on the reaction of silver ions, which inhibit the proliferation of bacteria. Tests carried out by certified laboratories, according to the ISO 22196:2011, have confirmed a drastic decrease in the presence of bacteria, without however altering the glossy glaze.

CLEANSTORM®

Cleanstorm®

The Forty3 collection evolves with a new version that blends innovation and contemporary design. Introducing the new 55×36 cm model, designed to optimise space without compromising comfort. The strength of this evolution is the CLEANSTORM® NEW flushing system, discreetly integrated to achieve a sleek and refined aesthetic. With its concealed positioning, the surface appears homogeneous and free from visible openings, enhancing the purity of its design while ensuring maximum hygiene, efficiency and quiet operation.

Ceraslide®

The careful control of temperatures in the various cooking stages, in a cycle that can last up to 26 hours, ensures perfect homogeneity of the product during the sintering process, reducing porosity and guaranteeing greater resistance against stains, dirt and abrasion.

Antibacterial treatment on seats
The antibacterial resin is treated with a specific antimicrobial additive that drastically reduces the presence of germs and bacteria on the seats, keeping the surface intact and shiny for a long period of time.

Technical information about Paestum furnishings

Materials

Chromed structures:

They are made in brass which is subsequently chrome-plated.

Cleaning instructions

All the above mentioned products must be cleaned by following the instructions here below:

Use a soft, slightly damp cloth. Avoid using grinding detergents or products that contain acetone, ammonia or solvents, furniture creams or waxes, alcohol or products for cleaning mirrors. We recommend that you also clean the mirror only with a damp cloth to prevent damage to the frame.

FURNITURE

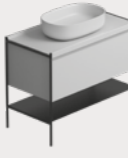

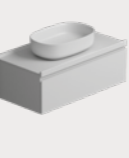

Ceramica Globo bathroom furniture was created to support the wide range of ceramic washbasins. With a minimal style, multi-material textures and functional feature, it allows you to furnish spaces according to different dimensional and containment needs and to compose a tailor-made setting.

Bromo
BR

Countertop made of DEKTON®, a revolutionary material composed of porcelain, refined glass and natural quartz. It guarantees functionality and a remarkable aesthetic result: free of porosity, it is easy to clean and highly resistant to all types of scratches.

MATERIA accessories

MATERIA

ACCESSORI
The MATERIA MT021,MT022,MT023,MT024, MT025,MT026 accessories are made of Iroko wood, available in matt black and canaletto finishes.

The colour tones are indicative, as they may change in relation to the printing method of the catalogue.

I MAESTRI

The defining feature of this collection of wooden furnishings is its pure, timeless design. Well-proportioned and modular, the wall-mounted cabinets and storage units can be placed side by side or stacked, complemented by minimalist étagère-style wall units or an elegant shelf for countertop Washbasins. The result is a collection that offers exceptional design freedom and versatility. Available in lacquered, textured or stone-effect finishes that enhance the materiality of wood, these cabinets can accommodate three Washbasin bases, either free-standing or built-in, made from a variety of materials. The collection is enriched by Línea, a fluted finish that plays with surface vibrations and light and shadow, accentuating the material-like quality of the wood.

Shelves **Hoja plus**

Dimensions of hydraulic connections for top mounted washbasins

Follow the diagram and the tables below, to get the correct dimensions of the hydraulic connections using the indicated formula.

A = Installation height of the **Hoja plus** shelf
(shown in the tables next to each washbasin available)

B = Water load for top taps
(obtained by formula)

C = Water drain
(obtained by formula)

All shares, both reported and to be derived, refer to a height of **900 mm** washbasin top from the ground.

To get the correct price of the hydraulic connections (**B** and **C**), carry out the following formulae:

B = A (dimension shown in table) - **80 mm**

C = A (dimension shown in table) - **160 mm**

Example :

Washbasin chosen : **B6R54**
Dimension **A** in table = 760 mm

(**A** 760 mm - **80** mm) = **B** 680 mm

(**A** 760 mm - **160** mm) = **C** 600 mm

Mounting brackets included, available as spare code FI018

Stamp and signature

Brackets for HOJA PLUS

For the wall fixing of the HOJA PLUS shelf, brackets are included, available as spare code (code FI018) Please make sure of the texture of the wall depending on the material you will use for the **HOJA PLUS** shelf, especially in case the composition is completely suspended (without furniture underneath). The company assumes no responsibility for the use and attachment to walls that are not adequately structured and ready for use.

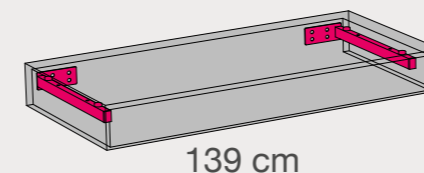

The mounting brackets (cod. FI018) have an adjustment of minimum 10 mm and maximum 32 mm (with a range of 22 mm). Globo does not provide the hardware for fixing the brackets to the wall and it is recommended a careful evaluation (by the installer) of the type of dowels and screws to use . The vastness of cases and types of use on different types of supports and bricks does not allow us to establish a standard fixing. We recommend fixing the dowels on all four holes in the bracket

code FI018

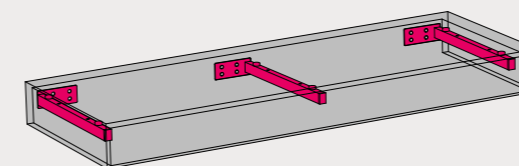

Reversible to the right or left by reversing the adjustment feet

N° brackets for shelf length

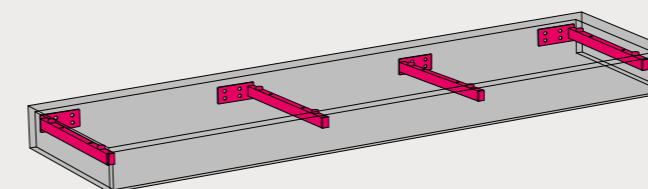

139 cm

Length up to 139 cm
2 brackets

140 cm

Length from 140 to 180 cm
3 brackets

190 cm

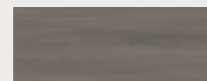

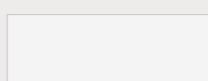

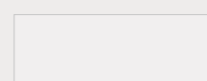

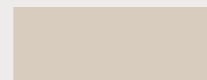

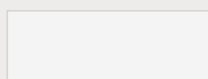

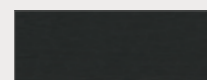

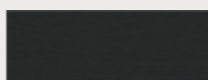

Length 190 cm
4 brackets

Examples:

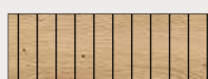

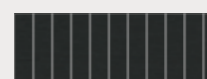

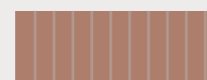

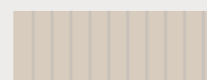

A 130 cm shelf, can be installed on 2 brackets code FI018
A 170 cm shelf, can be installed on 3 brackets code FI018
A 190 cm shelf, must be installed on 4 brackets code FI018

DRAWER RAILS
Full extension Blumotion guides with soft closing mechanism.

HANDLE
With integrated groove in the front.

AVAILABLE IN:
Thermostructured and lacquered melaminics

Top HOJA

TOP HOJA
They can be used only on the Mari and Tierra units. The different finishes available imply different thicknesses and different features and abrasion resistance.

AVAILABLE IN:
Thermostructured melaminics, lacquered, Laminam, TEKNO and CDF.

HOJA Plus shelves

HOJA Plus shelves
They are 12,2 cm high, supplied with fixing brackets already mounted and placed according to the position of the sink hole.

DISPONIBILI IN :
Laminam, TEKNO, CDF e Rovere

Wall units Kubiko

Kubiko wall units
They are independent furnishing elements that can be combined with any composition. Available in 2 heights (73,4 and 110 cm) and in 2 widths (25 and 35 cm).

AVAILABLE IN :
Thermostructured melaminics, lacquered and oak.

MELAMINE THERMOSTRUCTURED (Category 1 and Category 7)
Characterized by a panel of melamine coated with thin paper sheets impregnated with resin. The thermostructured are produced by placing these sheets on plates that reproduce natural surface structures (such as wood and stone) in an extremely realistic way. Thanks to the heat induced, such plates give the real feeling, perceptible to the touch and sight, of these surfaces.

CDF
CDF is a panel composed of wood fibers, compressed (> 1'000 Kg/m3) and dyed black. With a multilayer structure, the CDF boasts stability, scratch resistance to splashes and a low flammability.

LACQUERED
It is required a particularly careful maintenance in order to avoid scratches, so you can not use acetone and ammonium products, or abrasive powders. Avoid water stagnation over the entire surface.

TEKNO
Tekno is a combination of a natural mineral and a high quality acrylic resin. This allows Tekno to remain unchanged over time, without discolouring. The compact surface allows cleaning with the most common products on the market.

LAMINAM
Laminam is a mixture of natural raw materials. It allows, thanks to the high mechanical strength, to reduced thickness and to create products with large dimensions. The composition of the material does not promote the occurrence of moulds, bacteria and fungi. This classifies Laminam as a high quality product.

OAK
The presence of irregularities and imperfections of the surface of the antique oak denotes its authenticity. To preserve the oak over time, we recommend using neutral and non-abrasive cleaning products. It is also recommended to avoid water stagnation.

Code composition :

To order an item from the " I Maestri" collection, please compose the product code with the chosen finishing code (see page 251).

Example :

Washbasin unit **Mari** 70x50 h36,8 cm (**cod.MR3670**) in thermostructured melamine finish (**Category 1**) **Friuli wood LF** is:

MR3670LF

The code identifies the features of the product

MR : suspended washbasin unit **Mari**

36 : high 36,8 cm

70 : width 70 cm

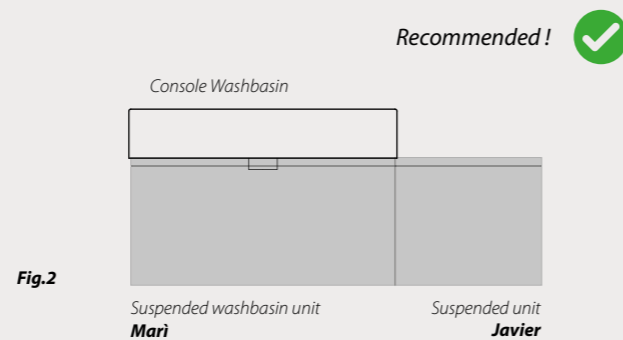

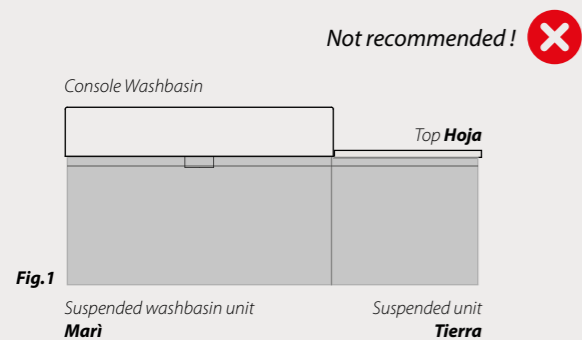

LF : Friuli wood finishing (**Category 1**)

Matching tips for furnishing elements in all available heights and top finishes

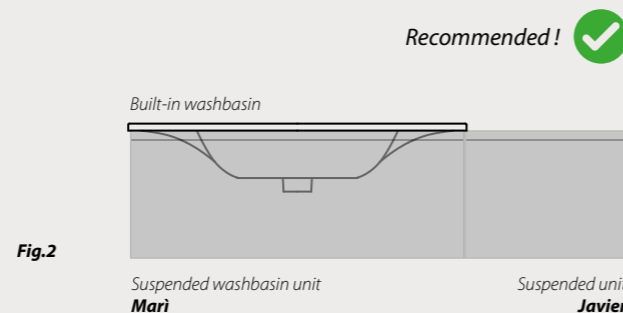

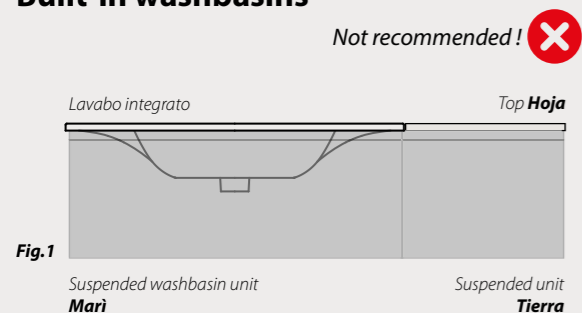

Console washbasins

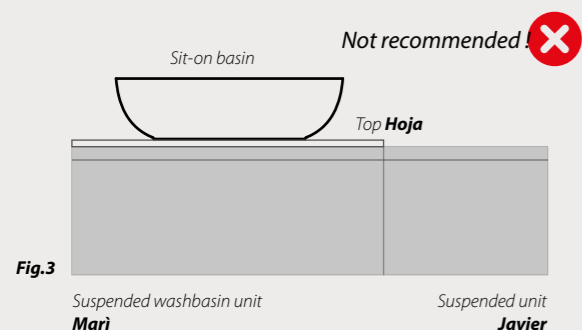

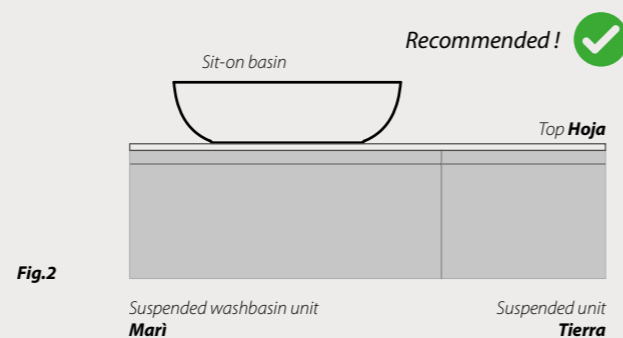

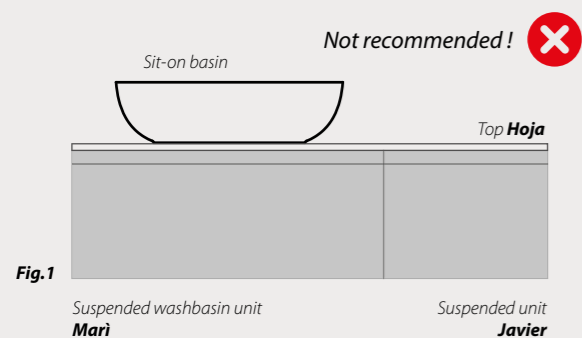

We do **not recommend** the use of a **Hoja** top mounted on a **Tierra** suspended unit next to a **Mari** washbasin unit in case of installation of a console basin (Fig.1). Therefore, we **recommend** the use of a **Javier** suspended unit, for which you do not need an additional **Hoja** top (Fig.2).

Built-in washbasins

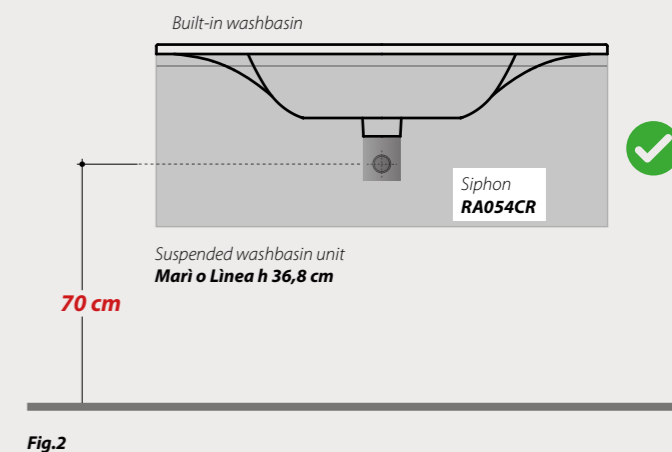

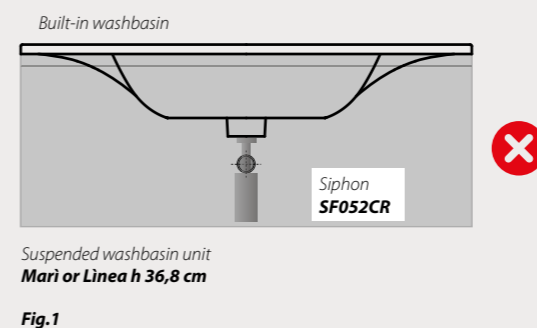

We do **not recommend** the use of a **Hoja** top mounted on a **Tierra** suspended unit next to a **Mari** washbasin unit in case of installation of a built-in washbasin (Fig.1). Therefore, we **recommend** the use of a **Javier** suspended unit, for which you do not need an additional **Hoja** top (Fig.2).

Sit-on basins

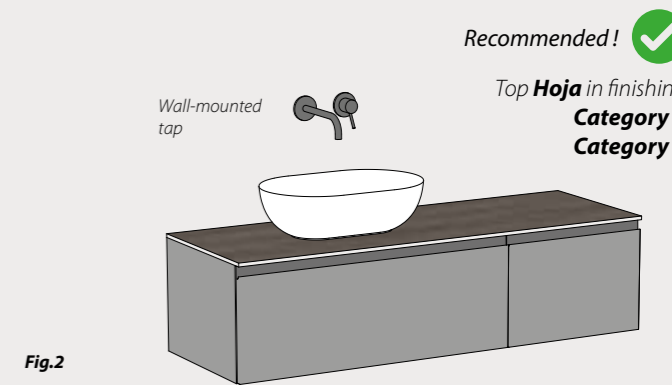

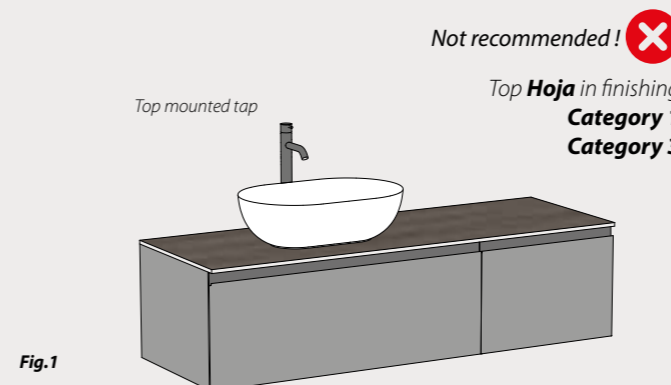

We do **not recommend** the use of a **Hoja** top mounted on a **Javier** suspended unit next to a **Mari** washbasin unit in the case of installation of a sit-on basin on top (Fig.1). Therefore, we **recommend** the use of a **Tierra** suspended unit and a top that covers the total width of the 2 units (Fig.2). Also we **not recommend** the use of a **Javier** suspended unit next to a **Mari** washbasin unit with a **Hoja** top which covers only the width of the **Mari** unit (Fig. 3).

Required height of the water drain, with GLOBO siphon cod. RA054CR, for installation of the built-in basins on **Mari** and **Linea** units h 36,8 cm.

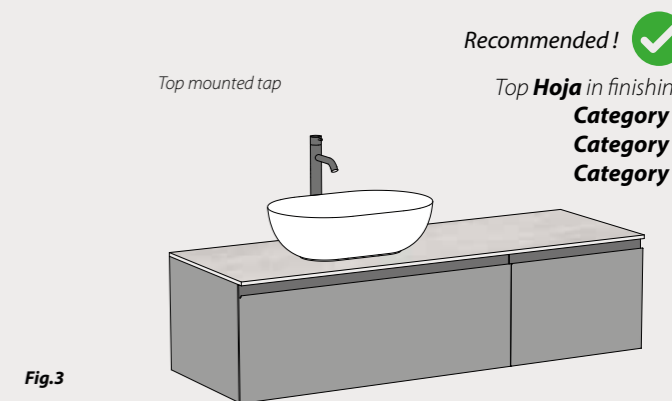

For the installation of the built-in washbasin on a **Mari** unit h 36,8 cm, it is **MANDATORY** to use the GLOBO siphon cod.RA054CR. With this siphon, the fixed height for the discharge is 70 cm from the ground (Fig.2). **ATTENTION!! do not use the screw supplied with the drain FI012BI.** Inside the siphon box RA054CR there is the correct screw to be used for fixing the drain.

Tips for choosing the finishes of the Hoja tops according to the type of taps chosen (wall or top mounted)

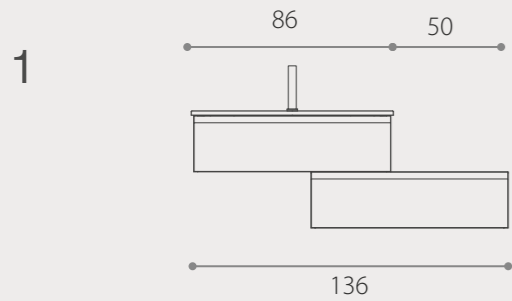

If you choose to mount a faucet on the top surface (Fig. 1) we do **not recommend** the use of a top in **Category 1** finish (Melamine) and **Category 3** (Lacquer). We **recommend** wall taps in case of choice of a top in the above mentioned finishes (Fig. 2).

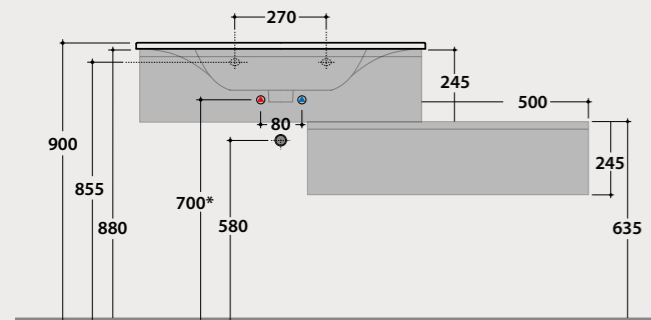

In the case of top mounted taps, it is **recommended** to choose a top in the following finishes: **Category 2** (CDF), **Category 4** (Tekno) and **Category 5** (Laminam) (Fig. 3).

Bathtubs in Livingtec®

Livingtec® is a material designed to meet the highest standards of quality, technology and environment. Its surface is homogeneous, non-porous and extremely smooth. The material, in addition to giving a sense of aesthetics of purity, is easy to clean and resists UV rays and daily wear. Completely non-toxic, inert, hypoallergenic and flame retardant. It can be restored by a special kit. It is recommended to install Livingtec® bathtubs shortly after purchase; if stored for several months in dark places, the white color may tend to change its tone/shade.

Bathtubs in Tekor®

A revolutionary high performance material that thanks to its chromatic homogeneity and the peculiarity of eliminating the joints between the elements, make it able to give elegance to environments. Tekor® is a technologically advanced composite material, formed by the fusion of high-quality natural mineral fillers of different granulometry, polymers and monomers of high purity. It is a printable, durable and hygienic material, very pleasant to the eye and touch. Its versatility makes it one of the most used materials by designers, since it allows to create objects of all shapes. The Tekor® has excellent thermal stability. It resists UV rays and daily wear. Completely non-toxic, inert, hypoallergenic and flame retardant. It can be restored by special kit.

Bathtubs in Simple fiber

Simple Fiber is a versatile acrylic material, highly regarded for its ability to be molded into diverse shapes and lines. From a technical standpoint, it offers a range of features that make it the ideal choice for bathtubs: it is durable yet lightweight and, most importantly, it is excellent at retaining water temperature.

Technical Information for Bathtubs

Tips for a proper cleaning

Bathtubs in Livingtec®

As a daily treatment we recommended cleaning the surface with liquid anti-scale detergent, for example: Viacal®, Ajax®, Cif® using a soft sponge. In the case of stains present for many days as e.g. halos caused by calcareous water, the Livingtec easily regains its original appearance through the use of abrasive sponge, only wet with water or detergents, previously indicated. In the presence of persistent stains, slight chipping, or deep scratches, we recommend a sanding action with 400-600 grit abrasive paper, until the surface is completely uniform. Then, rinse well with water, using the soft side of the sponge

Bathtubs in Solid Surface®

Suitable products cream or powder detergents such as Cif®, Vim® or similar, that contain micro-granules, that smooth the surface. UNSUITABLE PRODUCTS: solvents such as acetone or trichloroethylene and other aggressive chemicals such as strong acids (muriatic acid...) and strong bases (caustic soda...); very aggressive substances to pour the taps; solvents used in the painting industry. For industrial detergents, whose aggressiveness is unknown, try in a non-visible area, before applying them on the entire product

Bathtubs in Tekor® e Tekorlight®

- * Most dirt and stains can be removed with a detergent powder (Vim - Calinda - Aiax, etc.) combined with a scotch-brite abrasive sponge or a common chlorine-based cleaner (amuchina) or bleach.
- * For the removal of stains, caused by limestone, we recommend using a regular anti-scale product.
- * To maintain the original opacity of the product, occasionally clean with amuchina or with a 1/20 solution of sodium hypochlorite (bleach) diluted in water.
- * To enhance the typical opalescent/satin finish, occasionally use a scotch - brite sponge applying a circular movement.

Code composition

To order a shower tray DOCCIAPIETRA H2 it is necessary to indicate the product code followed by the color code.

Example: DOCCIAPIETRA H2 70.90 (70x90 cm)

Cod. DP209070XXX (XXX = color code)

color Bianco Cod. 506

Code composition :

DOCCIAPIETRA Cod. DP209070 + 506 = DP209070506

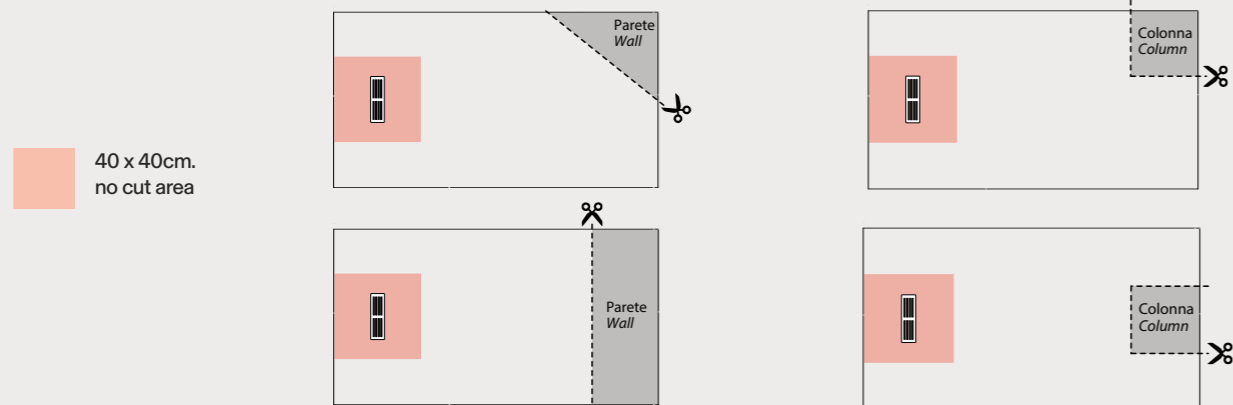

Customized cut at building site

For cutting the shower tray on the construction site, please follow the instructions below:

- Use diamond blades;
- First perform a pre-cut on the exposed side of the shower tray without cutting the plate completely until the base. Then make a second step for an effective cut. In this way, you'll avoid any chipping on the surface at the end of processing.
- The area around the drain must remain intact (without cuts) for a surface of 40x40cm size, where the drain is at the center of this square.

Ceramica Globo does not take any responsibility for the operations of cutting and installing the shower tray.

CUTTING EXAMPLES :

Custom cut on request

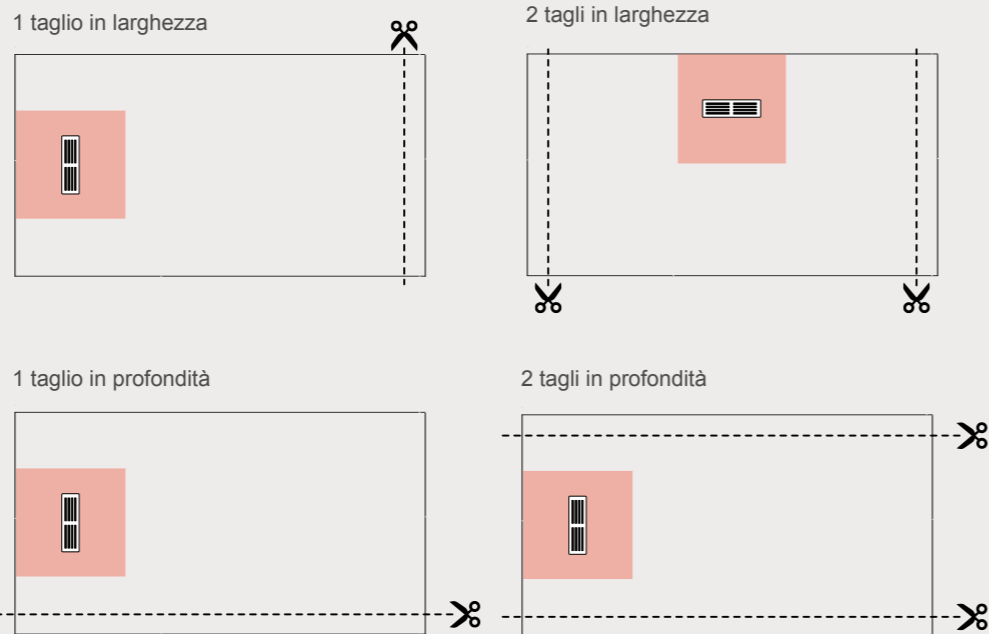

Specify, at the time of ordering, the type of cut to be made, following the information given in the diagrams below and filling out the order form on the following page. Consider the cost for each type of cut as shown in the legend below.

Legend :

Cut codes

- 1LV** : 1 cut in width painted € 146,00
- 1LG** : 1 cut in width rough € 62,00
- 2LV** : 2 cuts in width painted € 306,00
- 2LG** : 2 cuts in width raw € 124,00

- 1PV** : 1 cut in depth painted € 213,00
- 1PG** : 1 cut in depth rough € 124,00
- 2PV** : 2 cuts in depth painted € 364,00
- 2PG** : 2 cuts in depth rough € 184,00

40 x 40cm. Non cutting area

Code composition for custom cuts

E.g. shower tray DOCCIAPIETRA H2 90x70 cm, white with a cut in width painted cod. **DP2090701LV506**

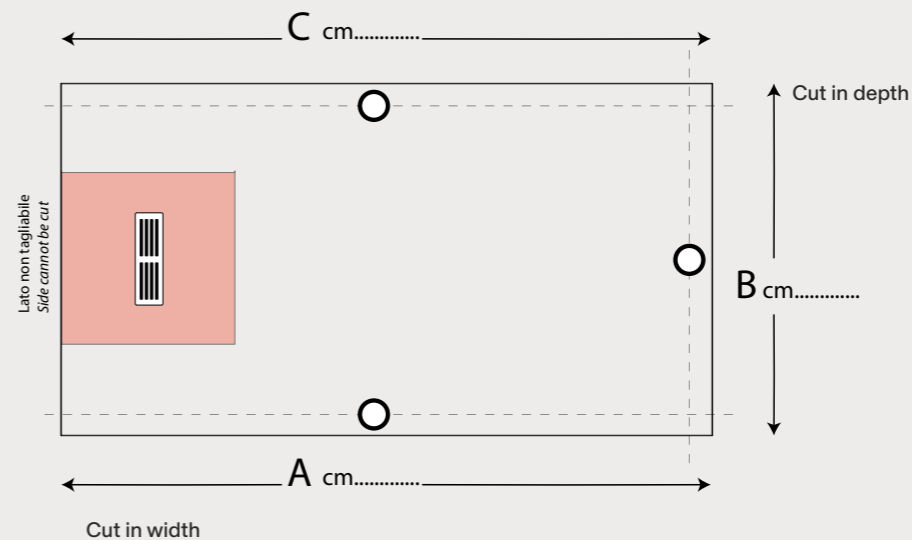

Order form for request of custom cuts:

1 cut (width or depth) or 2 cuts (width or depth)

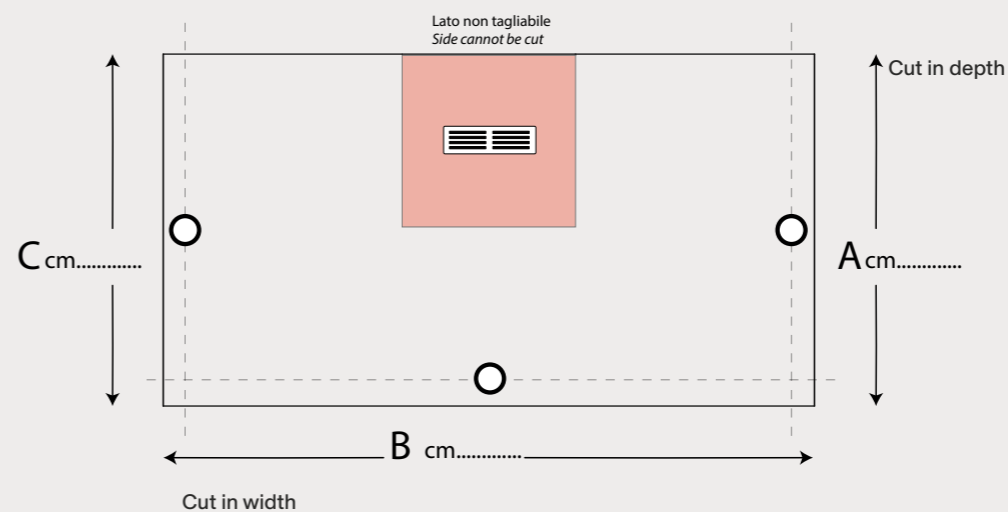

Date	Customer/customer code	Reference	Order number

Shower tray code	Cut code	Color code

ATTENTION : For shower trays with a side drain, 2 cuts in width are not possible.

In case of 1 cut, specify the side to be cut

ATTENTION : For shower trays with central drain, 2 cuts in depth are not possible.

In case of 1 cut, specify the side to be cut

40 x 40 cm. No cut area

1) Indicate the final size (width and depth) of the shower tray required.

2) Mark with an X the side (1 cut) or the 2 sides (2 tagli) to be cut. ~~X~~ A maximum of 2 cuts may be requested

Siphonic drain with
Flush Cover

Drain with Polypropylene cover for Shower Trays DOCCIATRE and DOCCIATRE PLUS

DVR3 80,00

NEW!

New DVR3 siphoned drain with polypropylene cover

Minimalist design and high functionality merge in the DVR3 shower trap, a further option for the DOCCIATRE and DOCCIATRE PLUS ceramic shower trays. This drain has been engineered to ensure minimal visual impact; it features a circular polypropylene cover that integrates seamlessly with the tray surface, protruding by only a few millimeters. The surface finish and low-profile design create a clean, essential, and modern aesthetic.

DOCCIATRE PLUS

Ceramic drain cover with anti-slip

Anti-slip surface

Featuring a contemporary design, it is spacious and has a reduced thickness. The anti-slip surface (white, grey, black) ensures safe use, thanks to its characteristics that make this product suitable for all ages.

Technical Information for Shower trays

Tips for a proper cleaning

Tekorstone®

RINSE THE SURFACE THOROUGHLY

USE soap and water or common detergents to remove most stains and dirt that may settle.

AVOID Aggressive chemicals such as acetone, trichloroethylene, strong acids and bases, cosmetics and dyes, in prolonged contact with the material can release colorants onto the surface.

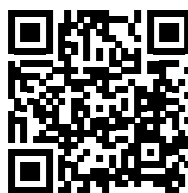

Ceramic

We recommend the use of warm water in combination with non-abrasive cleaning products..

WE RECOMMEND drying surfaces with a microfiber cloth to avoid limescale stains.

WE DO NOT RECOMMEND the use of abrasive detergents, alcohol-based or strongly acidic / basic, nitrous solvents and acetone.

Surface Restoration Shower trays in Tekorstone® with repair kit cod. DPKIT

Scan the QR code to view the repair video

Installation Types

Sit-on installation

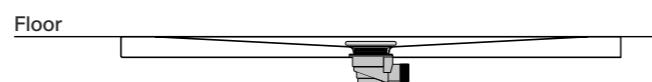

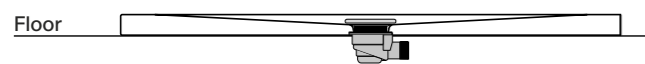

The shower tray is placed directly onto the existing floor, remaining raised by 2 or 4.5 [cm/mm] depending on the model, while still ensuring a height that minimizes the risk of tripping. This installation method simplifies the positioning of the siphonic waste and the connection pipe to the drainage system.

Floor-level installation

The floor-level installation lends itself to the most modern design interpretations. It allows for a seamless surface with the flooring and facilitates access to the shower.

Always check the thickness of the screed before installation to ensure it is sufficient to accommodate the shower tray. Consult the technical specifications to verify the height of the tray and the installed waste.

CERTIFICATIONS

UNI EN ISO 9001: 2015 Certifies that all the phases of the production process are carried out following very strict procedures with periodical controls which allow maintaining quality standards constant in time.

UNI EN ISO 14001: 2015 Certifies reduction in environmental impact deriving from the various production process phases. Ceramica Globo re-uses the water needed for production at an almost continuous cycle and is always looking for technical solutions that improve the draining efficiency of the sanitary fixtures in order to reduce water consumption.

UNI EN ISO 50001: 2018 Certification to the ISO 50001 standard ensures that your organization has a healthy energy management system, reducing energy consumption, environmental impact and increasing profitability.

In 2010 Ceramica Globo obtained the CSA certificate from CSA International, in order to sell its product range in the United States and in Canada, countries where specific tests, particularly demanding, are requested.

WaterMark in 2009 Ceramica Globo received the WaterMark certificate from Sai Global to be able to sell its products on the Australian market, which has always been one of the most difficult due to the quality standard demanded.

The EPD is a document that describes the environmental impacts linked to a specific quantity of product: for example energy and raw material consumption, waste production, atmospheric emissions and discharges into water bodies. The Declaration, on a voluntary basis, must be prepared by referring to the analysis of the life cycle of the product (according to the "from cradle to gate" or "from cradle to grave" approach) drawn up according to the guidelines of the UNI EN ISO standards 14025 and the specific rules for the PCR product category (Product Category Rules).

GENERAL CONDITIONS OF SALE

ORDERS

The acceptance of the order is always submitted to the approval of the supplier by giving his written confirmation to the buyer.

DELIVERY

Except for particular condition, goods are delivered ex factory and travel at buyer's risk even when they are delivered free port of destination. The order can be partially delivered. The cost of transport is at customer charge. Shipment are made on behalf of the buyer. In case of damages, breakages and shortages, the buyer has to notify to our firm through the carrier at the moment of the delivery. The supplier is the owner of the delivered goods up to the due payment. Terms of delivery are subject to variations and depending to the possibilities of the moment. Our firm is not responsible for any delay or missing deliveries caused by any facts independent of our will and any claim for reimbursement for any delay that may occur in delivery will not be accepted.

PAYMENT

Payment must be addressed to the supplier head. Any other form of payment is at complete buyer's risk. If payments are not made within the agreed expiring date, our firm has the right to stop the outstanding deliveries. Any delay in payment gives also the right to ask for the due interests at the current banking rate increased of two points.

PRICES

Prices can change at any moment and without notice. They can be replaced by the ones coming into force during the delivery of goods even if they refers to previous orders.

WEIHGTS, MEAUSURES, COLOURS

Technical dimensions, weights and colours in the present price list are approximate. Any product can be modified or dismissed at any moment without notice. Little discrepancies may be found between the dimensions shown in the catalogue and the real pieces because of the manufacturing characteristics of the articles in ceramics.

PACKING

The packing of the goods is made per pallets and other form of packing involve a further charge.

CLAIMS

In case of manufacturing faults and defected goods the buyer has to claim to our firm by registered letter and within 8 days from reception of goods. Only the goods that will be found defected for faults of manufacture will be replaced by us. Any freights of any sort for the replacement of faulted goods are at buyer's charge.

CONTENTIOUS

For any dispute the competent jurisdiction is the court of Viterbo even when the contract has been drawn up elsewhere.

The prices of the present price list are meant ex factory and don't include V.A.T.

As a partial recovery of the packing cost, the 4% is charged with a minimum of 20,00 for orders up to 500,00. The composition of the pallets is underlined in the price list. Any variation of the standard composition will make a further charge of 3%.

These general conditions of sale are integrally approved by the buyer from the sending of the orders and collection of goods.
